

# NOTES ON INSTALLING THE CALL SYSTEM FOR SWIFTS

## PLASTIC BOX CONTAINING THE SPEAKER

The plastic box containing the speaker should be placed close to the nest box – within a metre.

**NOTE : DO NOT ATTACH THE SPEAKER BOX TO THE NEST BOX**

Example of best location for speaker box

Attach the box to the wall with screws.

MAKE SURE THAT THE BOX IS POSITIONED WITH THE DRILLED HOLES FACING DOWNWARDS SO THAT RAIN DOES NOT GET INTO THE BOX AND DAMAGE THE SPEAKER (these holes are to let the sound out and to prevent condensation building up inside the box).

Attach the box lid using screws.

Run the speaker wire to the amplifier.

Make sure speaker is positioned with drilled holes facing downwards.

## AMPLIFIER

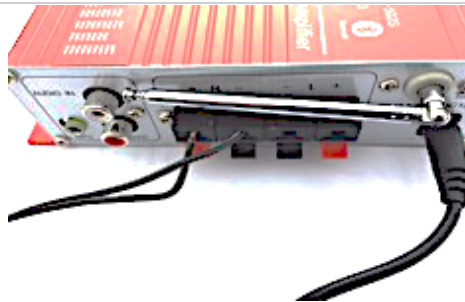

The amplifier should be located indoors next to a power supply

Connect speaker wire to the back of the amplifier at the red and black levers either left channel or right channel.

Connect power supply to the speaker.

The Calls are pre-loaded onto the SD card.

On the dials at the front of the amplifier set the BASE dial to 0 and the TREBLE dial to Maximum. volume should be set to no more than  $\frac{3}{4}$ .

TURN ON THE AMPLIFIER AND SET THE VOLUME. YOU SHOULD BE ABLE TO HEAR THE CALLS WHEN STANDING APPROX. 5 METRES AWAY.
